#### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: It is known in the prior art to produce adsorbents comprising montmorillonite, bentonite, magnesium silicate, and silica gel (see below). However, those ingredients and 11-30% Indian red potters clay in combination with 1-5% hafnium and 5-30% bentonite in the radioactive treatment composition of the instant claim 1 would not have been obvious to one of ordinary skill in the art at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Monick et al. US 4,765,908 discloses a composition for removing contaminants from wastewater comprising montmorillonite, bentonite, polyelectrolyte, silica gel, and magnesium silicate (see abstract and Examples); Wise US 4,166,039 discloses a granular detergent composition comprising kaolinite, bentonite, clays, and surfactant (see abstract and Examples).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M.
